Subject:	State Compliance (MA) Testing

The fifty (50) state compliance samples (Marlboro and Basic) are here. I've talked to Brenda and Martha, and they would like to receive the samples on April 12 and begin smoking on April 15. Martha will check the priorities and determine if these dates are OK. Brenda suggested that we set the single smoking cubicle up for FTC and the remainder of the Filtronas to smoke MA style, which would enable the lab to do 20 runs of state compliance per day. With no rechecks we have 63 runs. Please contact me if you have any objections to starting on April 15.

I have attached the updated Massachusetts Work Instruction.
